**Subject:** RE: ASR #6228 and sample delivery, and question on B and Sr

Nicole, thanks once again for the good idea. I will keep them on ice and bring them back with me in one delivery.

Unrelated question: USGS is helping us analyze the data from these samples, and they would like analytical results for boron and strontium with a reporting limit of 5-10 ug/L as part of the metals analysis. Can you do this? If so, please add it to the ASR.

Sincerely,  
Daniel R. Gravatt, PG

Principles and integrity are expensive, but they are among the very few things worth having.

**Subject:** ASR #6228 and sample delivery

Dan:

Thank you for submitting your ASR (#6228).

I wanted to ask you if you want to keep your shipping costs down, you can keep all the samples you collect the week of 10/7 and deliver them all on Thursday (10/10) you can do that.

Metals have a 180-Day holding time so holding them is not an issue and the LDL VOAs have a 14-Day holding time. If you collect and properly preserve your LDL VOAs starting on Monday (10/7) and bring them in on Thursday (10/10) by 11am, you will only be 4-Days into the holding time. That should give all labs. plenty of analysis time, unless they have major instrument or dilutions/re-run issues.

So, please let me know if you would like for me to note on your ASR that you will be delivering all samples in 1 batch on 10/10 instead of batches (i.e. on Wed. and 2 batches on Thursday).

Thanks..Nicole ☺
